

# Data analyst interview

## Business oriented case

**Description:**

You will be asked to present a business case from your work - a commercial (do not break any confidentiality agreements) or private project where you had to use your analytical knowledge. Tell us about the problem that you are solving, the challenges you faced, and the results that you got. Elaborate more about the technologies that you have used, the complexity of the solution, and your involvement in the project.

**Format:** Oral presentation with optional slides

## Homework

PySpark and scripting task provided by the recruiter.

## Interview structure

**Duration:**

Approx. 1.5h

**Structure:**

The interview will be divided into two parts:

- Candidates will be asked to present a prepared business case
- Then we will discuss the candidate's homework and verify technical knowledge and practical skills
